*Students not starting in MATH101 may require additional terms to graduate.

**General education courses are reflected as (MC/>1/2). To complete general education requirements within eight courses, students must 'double-dip' two multi-cultural courses with arts & letters or social science courses.

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them. Students can begin to explore on the departmental website <https://physiology.uoregon.edu>.
